## **Linear Air Leading the Charge in the Expanding Air Taxi Service** *A new alternative to commercial air travel for Philadelphia travelers*

Concord, Mass., July 28, 2008 – Traditional commercial air travel and its inherent challenges are causing resourceful Philadelphia-area business and leisure travelers to explore alternatives. As a result, Linear Air, a provider of point-to-point air taxi service from the mid-Atlantic region through eastern Canada, is building momentum in Philadelphia.

More astute business and leisure travelers in Philadelphia are now recognizing that Linear Air is a viable alternative to traveling on commercial airlines from the overcrowded hub, where traveler frustration and commercial air travel concerns continue to make headlines. Philadelphia International Airport recently ranked as the 5<sup>th</sup>-lowest rank in the country for “taxi-out time” and 25<sup>th</sup> out of 32 airports for on-time arrivals; also, the Travel Industry Association estimated that air lines have lost \$9 billion in revenues from flight “hassles.”

“Philadelphia is a key market for both inbound and outbound travel. The air taxi concept is gaining fast acceptance for business and leisure travelers, especially in congested markets,” said William Herp, CEO of Linear Air. “Philadelphia is a savvy market that recognizes the economic, time-saving and environmental benefits of traveling on an air taxi service like Linear Air. We are building on the momentum throughout the east coast to offer a true on-demand air travel services as we grow our fleet and expand our service area.”

Linear Air flies very light jets from Eclipse Aviation. Technologically advanced, eco-friendly and efficient, the Linear Air Eclipse jet is faster and uses less fuel than other jets. This efficiency allows Linear Air to offer customers the most competitive pricing in the business jet travel space.

Linear Air tailors trips to meet the needs of its business and leisure travelers. Arrival and departure times are based on the customer's schedule, eliminating time spent waiting in airports and preventing additional hotel costs for overnight stays. Linear Air also services easily accessible regional airports, which are typically closer to customer's homes and offices.

Linear Air currently services the following airports in the Philadelphia region: Northeast Philadelphia Airport (KPNE), and Wings Field Airport (KLOM). Linear Air also services the New Castle Airport (KILG) in Wilmington, Delaware.

#### **About Linear Air**

Based in Concord, Massachusetts, Linear Air provides point-to-point air taxi service with unprecedented service to more than 750 cities in the Northeast, mid-Atlantic and eastern Canada. The Linear Air fleet includes three-passenger Eclipse E500 business jets and eight-passenger Cessna Grand Caravan turboprops. Linear Air is a FAA-certified part 135 charter operator that maintains a Gold safety rating from ARG/US, the leading independent safety auditor in the aviation industry.
